“Artificial Intelligence is not a substitute for human intelligence. It is a tool to enhance human creativity and ingenuity.”

Dr. Fei Fei Li – Professor and Co-Director Of Human-Centered Artificial Intelligence @Stanford University

The current issue with AI

The use of AI has become increasingly popular within education.

The global AI in
education market was
worth \$2.5bn in 2022
and is expected to reach
\$88.2bn by 2032

Source: Allied Market Research

The current issue with AI

The use of AI has become increasingly popular within education.

But so has its misuse.

~35%

Student decline in critical thinking and decision-making.

~70%

AI tools exhibit biases affecting education quality.

The current issue with AI

The use of AI has become increasingly popular within education.

But so has its misuse.

How can educators and students navigate AI
appropriately?

Roadmap

Initiative	Objective	Sep	Oct	Nov	Dec	Jan	Feb
Market Research	Problem analysis, market-fit, value-proposition.						
User Discovery	Talk to potential users (students and professors) to understand problem better.						
Develop a MVP	MVP for alpha testing.						
Usability Testing	Conduct user tests for the product and iterate.						
Investor Search	Pitch ANDL to investors and institutions.						

The Future with ANDL
